

Peace Theory

Omar Butt

Cover: US share of world economy collapsing

All praises are for Allah. We seek Guidance and forgiveness from Him. We also seek refuge in Him from the evils of our own selves. Whoever Allah guides, no one can misguide him. Whoever He lets go astray no one can put him back on track. We testify that there is no god but Allah and we testify that Muhammad is Allah's Servant and His messenger.

“Except for those who repent, believe and do righteous work. For them Allah will replace their evil deeds with good. And ever is Allah Forgiving and Merciful.”

The Holy Qur'aan 25:70

Introduction

Terrorism

India doesn't stockpile nuclear weapons for Diwali- Smiling Buddha etc. are but militaristic terrorism, only cowardice can motivate Indians to bring this fact out into the open for the whole world to see, I'm referring, of course to the great Satan, USA, who's Giga-murder of innocent human beings since its inception, is terrorism and the morality of human rights abuses is exemplified by mega murder of American citizens on it's own soil by USA's own people. Non-state US mega- murder, state terrorism and so on, and state oppression such as slavery and mass extermination in prisons, prison camps or mega extermination camps inside the USA. These are examples of US Giga-murder. This terrorism is founded in Islamophobia. Indeed, USA itself is an Islamophobic country which has all been conquered by Islam. If USA causes worldwide terrorism such as COVID-19, what about the nation wide extremism of the gun laws which are as well a form of mega-murder?

I am of the opinion, Pakistan 26th country in the world per national output can become 12th or 13th as others have suggested, this is simply by being shown the ropes: by seeing it done on the screen. Through information technology, information systems and artificial intelligence etc. advances.

One way in which 4% of the world's population can at least claim 4% of the world's national output from at present half a percent, is that the USA or a similar population is claiming maybe 20% or six or seven times its fair share. Over the next thirty years however, the US economy's share in the world economy will rescind naturally, to an equitable level.

This will this extra world GDP for five or six Americans can feasibly be turned into five or six new replacement superpowers over USA: Pakistan, India, Indonesia, Bangladesh, China etc.

Terrorism doesn't just mean senseless violence. Rather it is violence without reason. This means there is neither forgiveness nor being forgiven. By forgiveness or being forgiven, I mean forgiving self and other. In other words, there is neither forgiving self, neither other. Neither is self nor other being forgiven. If I translate this into common parlance, anti-terrorism and counter-terrorism are forms of terrorism because they do not give to, forgive me, that are they being forgiven self, nor other. In fact, it is a much more powerful form of terrorism which we call anti-terrorism or counter-terrorism.

The fog of war

I've studied security issues for a long time now. I have I believe, been alive on earth in this life, whilst the worst of humanity's wars were waged, and wars are the worst.

The suffering from the fog of war and infocide to the side for one minute, if we forgive and forget famine or war famine, for a second; the loss of war or the sufferings of war falls on a few simple groups as follows:

Military age males (death of soldiers), orphaned children (death of children's parents), raped women and girls, destruction of infrastructure (industrial loss), failed growth potential (unrealised wealth). Having seen such categories as above, wipe out many countries, men, women, children's lives, or other, economic potential losses, I exclude the actual win or loss of a war and it's inter- or intra-national consideration, as a part of the overall success and really, failure of wars. As an innately pacifist person, I think this is right. There is no real war. All wars are futile and they belie tragedy for all those involved.

The failure of reverse colonisation

We say our people take bribes and are therefore corrupt, but does the system give them a chance? It is a two-tier system.

Firstly, Urdu-medium has to compete with English-medium. If an Urdu speaker gets an English degree, having read for an English taught degree at undergraduate level study, is it not preferable that he does so from his native country?

Secondly, is it wrong to study in the mother tongue in the first place, given he can't get a degree at all. If PIA need pilots, what option do they have for the brain drain?

The failure of decolonisation

in the twenties, fifties, sixties and nineties, many countries were liberated from the clutches of colonialism. From here we think, those people, for example, the people of Bosnia, India, Algeria or Uzbekistan; are free.

However they are not. They are yet to be given their freedom. When an Eastern European, African, Asian or Middle Easterner; a person from the country we say has succeeded as decolonisation has, goes to a library or museum, from say; Turkey, Britain, France or Russia, they see the artefacts and treasure from their homes as peoples stolen and are even asked to recognise this as somehow being encultured or civilised.

The problem is when Eastern Europeans countries were freed by Turkey, African countries freed by France, Middle Eastern countries freed by Britain, and Asia minor's countries freed by Russia; they are still in dire need of freedom from their respective colonisers a hundred, or seventy, or sixty or even thirty years later.

Zakat

If, as many Muslim scholars and statesmen have indicated, the Islamic welfare state can lead to massive income redistribution in the global economic model, how does this paradigm shift seek to implement itself, and why?

Without answering briefly as regards to microeconomic and macroeconomic issues inside and outside the Ummah, this is not possible.

Briefly, there are six sources of wealth for a person: Work, rich nears, poor-rate, guarantees, other rights and alms or favours. As well as this, governments operate with a fluidity and are not a fixed variable under consideration. The size of the public sector, emphasis on economic progress in countries and international aid are all factors to be considered.

Other than this, it is hard to say, given the six factors which determine largely our obligations, and the other governmental factors, determining largely rights; what will happen in the future and why. This is similar to the business and corporate level between these two.

Nevertheless, the fact of the hidden and abstinent ones being more deserving of the poor rate, is a good example of the dualism by which not only does the Islamic economy implement itself throughout the globe, but the income redistribution is intuitively attributable to the very beauty of the religion of Islam as by its five pillars.

1. Dar al Mumineen

As the juristic position on Dar al Islam is that dar al kufr ceases to be so when Islamic law and rule gains ascendancy, and two other conditions exist as per Imam Abu Hanifah (RA) and a consensus thereof.

The first condition is that there is safety and security in the Dar al Islam. This means that there is no major shirk or kufr exempting the normal practice of the religion of Islam, and that Muslims and Dhimmis (non- Muslims) are safe here.

The second condition is that there should be continuity of land of Islam. This means if we consider a land to be Dar al Islam, it's border must be running in the Islamic Ummah.

These are Imam Abu Hanifah's two additional factors, making a total three factors. Dar al kufr, he has said the converse three factors. Law and order becomes kufr, the state is bordered by no Muslim state and Muslims and dhimmis have no safety.

However Abu Yusuf (RA) said if law and order is kufr, that will suffice. However that is deemed impossible as Imam quotes the hadith,

“Islam must have superiority and not inferiority”.

By this quote Imaam Azam affirms Dar al Islam to be eternal, as the following statement of Al Jassas says, otherwise it's opposite might grow to be dar al harb,

"I believe that Abu Hanifah only said this based on the conditions that existed in his time when Muslims fought idolaters. It was not possible according to him that a dar al-Harb could exist in the middle of the abode of Muslims, where the inhabitants apostatise and despite the armies of the sultan surrounding them remain strong and have loyal subjects. Had he seen what has happened in this time, where people are negligent of Jihad and betray one another and those in leadership are engaged in corruption and show enmity to Islam and its adherents and belittle the command of Jihad and its due, he would say the same thing as Abu Yusuf and Muhammad about a town like al-Qirmiti, and in fact many towns like it which we dislike to mention here."

Sharh Mukhtasar al-Tahawi, 7:215-8

If, as in USA, people pray more everyday as per Islamic laws and norms, and in UK, the people here are praying more in the week as per Islam; then it is high time we demand the wars against us Muslims, in Syria and Yemen and so on and so forth, cease for our own dignity and integrity to remain in tact. The war on terror must be seen as now a senile war with clear losses of UK and USA.

Further, as adult christians in USA are a minority there, and UK whites are a minority here; the dominion or former white colonies should be reparated and the commonwealth dissolved. If we are not part of the Muslim Ummah as of yet, we are still, in USA and UK, Dar al Mumineen and Dar al Muslimeen (relative Muslim majorities, in some respects).

2. Islamophobia

One of the key take-aways of the creation of Pakistan and the Pakistan Movement is that slogan,

“Pakistan will be created!, We will create Pakistan!”

However this confessional state is the world's greatest, Islamic, atomic power. It is not necessary for all to aspire to such a great populous, such military might nor confessionalism as such altogether, as such altogether in one nation. The point being that Pakistan as a country is both created from inside as a civilisation with its own history and so on; and for outside, as a democratic neighbourly republic in the world.

In Europe we may be seen as Islamophobic but it is no reason for our people to not embrace Islam nor for our state institutions to cleanse themselves of Islam. If we don't have a self-created country it means we can still have a Muslim country nevertheless.

Extremism, quite simply is when non-Muslims are racist such as Jews are Zionists; or Christians, Fascists or Nazis. Terrorism, by extension is when the people of the book take wars to foreign fields without reason.

3. The cathexis of Islam and Christianity

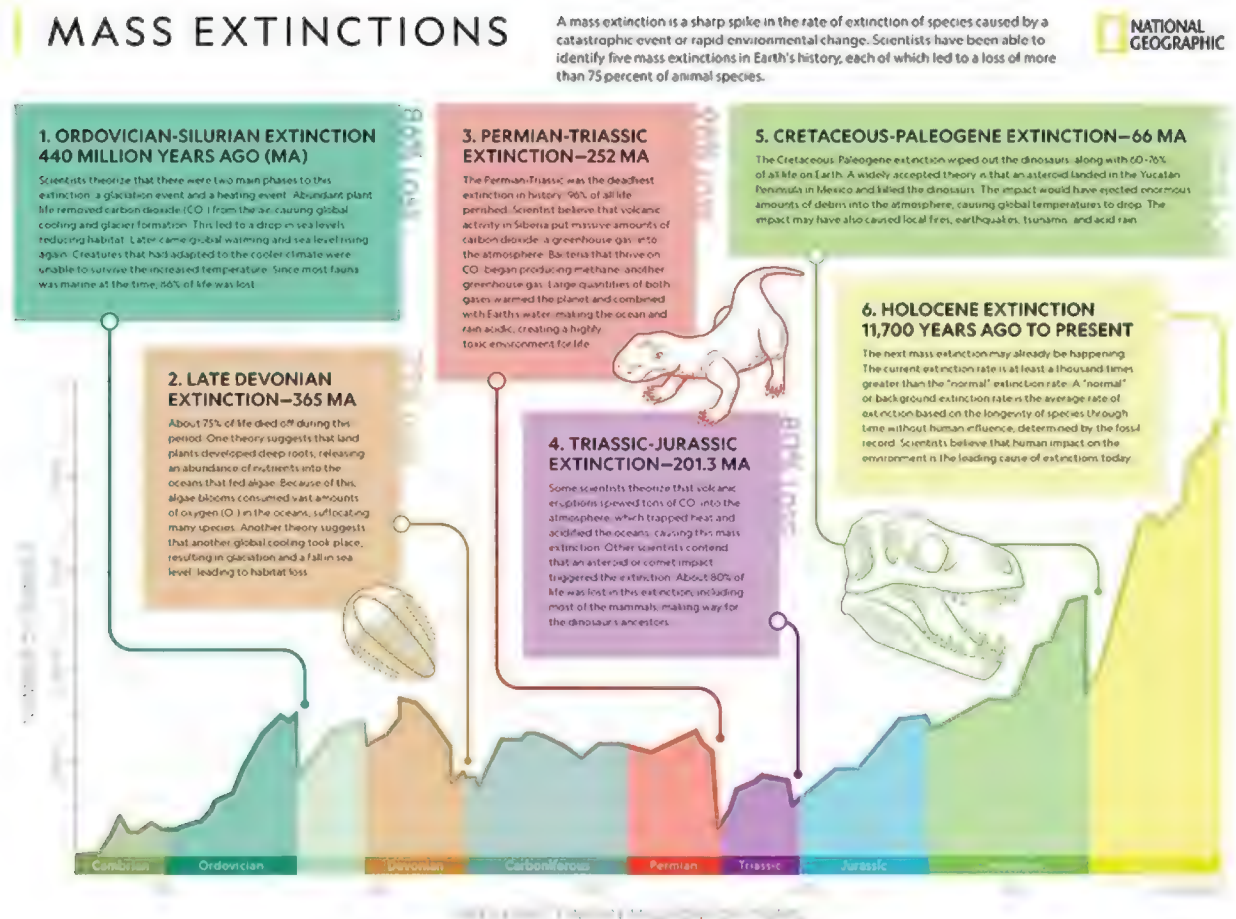

Since Islam emerged as a religion with the coming of Allah's Final Messenger (PBUH); we, as Muslims witnessed crusades and wars against us, always of a false-flag insidiousness. The real axes of evil, Christianity; through imperialist countries tried to fight an all-conquering Muslim land (ie. the Ummah as a whole) by attacking our each and every country one by one.

What follows is no revenge, no attacks on the European countries but rather these same empires then begin to take our countries as colonies. What the war on terror is, as a follow up to the crusades of the dark ages, is a shift back to a hunger for empire, but without any failure on the part of Islam and of the Ummah to have successfully liberated scores of countries from the colonial advances. So really, the war on terror is a reaction to decolonisation and the gaining of independence from western countries.

However if we extend this process and logically draw out a conclusion, we see it for what it is; nonsense from the beginning. When Islam came, much of the world; including the Middle East was and still is a part of Islam, as the people are Muslim. As the tyrannous crusades were followed by independence in the face of imperialism and colonialism; the war against Islam led to decolonial destruction of the

west's dominance over the rest of the world and the diminishing of it's religion on it's own soil, through destruction of it intellectually.

Salahuddins and Boumediennes are part of our history, so too are Osamas; and now too are those who believe Christianity is terrorist and Christians are colonisers needing to be defeated. This is a fourth and separate group which now exists, basically, because the Christian, the murderer of Christ,

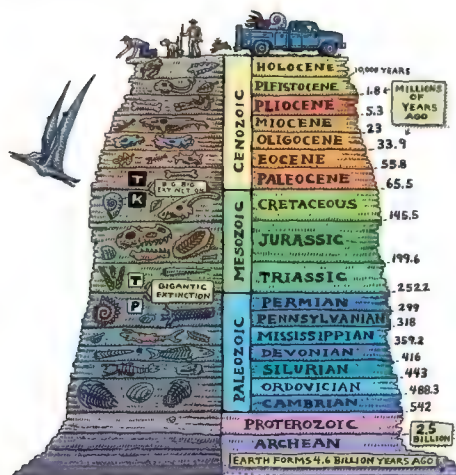

should not have a land or empire and not ever have had a land or empire, not ever, not even in the future. Clearly what has happened is that psychologically we have in this world,

come full circle; reached a point of mental cathexis, and found ourselves liberating ourselves from Islamophobia without realising it. In truth, the so called temptation of Christ in the new testament is being played out as Christianity loses it's position and role as the species' and the earth's main religion.

However just as Pilates', Richard I's and Churchills' were non-Muslims and Islamophobes; so is Brendon Tarrant and the like, who go to Muslim places of worship, with maximum Muslim adherents; in imperialist, colonialist, war-bent countries, and murder innocent Muslims. There is no Christ for Muslims, and yet how is there a god for Christians? Because of their murdering Muslims, innocent Muslims.

The four or five extinctions of prehistory plus our Holocene extinctions

The Holocene as the sixth extinction

Diagrammatic view of Christianist annihilations of humanity

	IMPERIALISM	COLONIALISM
DAR AL ISLAM	Crusades	Independence
DAR AL HARB	GWOT etc.	Decolonisation

Summary of Christianity's four extinctions of Muslims

1. Crusades against Islam and Dar al Islam

Slavery was a crusade against Islam, as was the African holocaust which led to the Red Indian holocaust too. In a sense this was the beginnings of the Non-muslim violence against Islam.

2. Colonisation and independence from colonisation

Muslim Indian holocaust and so on led to the unshakling of the Muslim mind from the yoke of Christianity. Although the Non-muslims imposed mass famines against us, we fought back and resisted.

3. Global war of terror

Just after the world war was the global war against Islamophobia. Violent revolution in the Muslim world was caused by Jews and Christians and led to no real resistance.

4. Decolonialist war

Today are merely remnants of civil wars caused by Christianists in the world. Here both sides in the violence are Non-muslim. The terrorists and the authorities etc. False flag warfare is another way Islam is meted out violence without being capable of resistance, sadly.

11% extinction at the hands of America

The extinctions of non-humans is; in the Paleozoic, Mesozoic and Cenozoic, 75, 86 and 96%, 80%, and 60 to 76% loss. In human life, USA is a 11% extinction in the holocene, assuming a billion have perished at their hands, and there are eight billion people alive today ie. measured from today.

Measured from the beginning of US state, since the fifteenth century when whites occupied Native land with slaves; this manmade decimation has left us on our fourth species'. In other words they are making us extinct for the fourth time.

When we look at Pakistan as a secret of civilizations, as well as the cradle of civilization; it is without doubt the invention of the city or citadel which has done favour to Pakistan in the last ice age, and in'sha'Allah will do so again in this Ice Age. What marks human development before the glacial period as well as after is the Pakistani city. In'sha Allah azza wa jal, if China is the world's leading economy by

population, GDP and PPP; it is because in this decade, it has mainland cities such as Shanghai areas such as Hong Kong: if India has this potential, then it is because of the potential Silicon Valley's.

We see Britain as a mega city, Qatar too is albeit, within Dar Al Islam: America's closest to a city. With self control comes societal progress, with this growth comes; community and with this cities and countries.

Like this, Allah subhanahuwa taala harnesses us for His Might and Glory. Anything is possible. Ancient Egypt had Cairo. Babylon was there in Mesopotamia; Athens, Constantinople, Rome. The example of famous and great cities are out there in the Middle East, nevertheless; Pakistan has two lessons to concentrate on in the coming future.

Firstly, to grow a secret weapon city. Secondly, for that to make the country great again. Without doubt a city which differentiates itself in Pakistan is a requisite for Pakistan to differentiate itself amongst the countries of the world as a superpower. Dar al Hakumat might or a capital city works for India and China. However, USA has no such major city. Only small Silicon Valleys. UK has 10 or 12 islands as groups, the Caribbean, Pacific islands etc.

If Pakistan is ever to succeed; after equalising the power of the world's superpowers, it will only be possible if Pakistan

is invent a mega city. Without the technology of mass producing silicon chips, which USA has now lost to China; India and Pakistan cannot lead the world as we are relatively poor. Pakistanis have income in hundreds or just about \$1,000 in a year, whereas Americans by 30 years have it in their hundreds of 1000s.

India is now very much taking China's route. The great leap from matches the leap forward and will continue to do so until it overpowers Maoist revolution (Deng's reforms and opening of the Chinese economy and its triumphing over USA). No doubt microchips will be mass produced there and not in Pakistan, and this will be to our benefit. The Pakistani economy will find this boon, both to our advantage and being a healthy economy; the presence of a superpower next door will mean Pakistani economy can differentiate itself as a superpower. Again, for the very reason of Metropolises, and information age advances.

As a philosopher Allama Iqbal, prophesized EK TAZA JEHAN, Pakistan, but he has left us a gap in terms of creating a vision for the mega city, a world mega city. Where is the first government that can deliver Pakistan from the potential for superpower to a great country with great cities again, just as in proto-history?

4. Deconstructivist decolonialist theory

Barring the holocaust of the Red Indians, every gigamurder of America has been against mainly Islam and Muslims. Slavery, World war, revolutions, the Raj and all of this conflates in their war of terror, where nuclear bombs are used on all.

Against Islam

- 1, Crusades- slavery
- world wars
2. Colonialisation- raj
- mass famines

Against Muslims

3. Global US terror- megamurders
4. Decolonialist war- ?

The theme runs from Judaism, holocaust, the slavery of Israelites through to the then Christian Americans to eschatological armageddon-type war or terrorism.

The Decolonialist theorist must begin to deconstruct these wars of military aggression, in order to know who is the

aggressor? Were the communist famines the intended outcome of capitalism? Given the usurping of Indian Raj in Asia and the massive capital formation from India and West Indies too, it is hard to say the mega-death tolls were never the intention. Indeed, just slavery and the assault of capitalists on Africa created World War, the assault in Asia created global war. Although USA has never formally declared war on Muslim countries as such, the Islam of Africa, Asia and the Middle east, such as wars against Yemen; Europe, such as the Bosnian war, but not the Americas has been noted.

The truth is USA is founded on the mass extinction of Red Indians. This means although Muslims weren't the target of US terrorism; in time, we have become public enemy number one, and faced Giga-murder across the continent.

Just as the requirement for World War was to enslave Muslims, the requirement for global war was to starve us. If the deconstruction of American aggression tells us the World War furnished by the Holocaust is Judaism, then the global war on terror or of terror, is above and beyond Islamophobia and is a Christianist attempt to annihilate every last Muslim on Earth: Indeed, as a former majority Christian nation USA has occupied the Holy Land such as Iraq, Syria, Afghanistan.

By occupying Iraq, the American gained privilege to pervert the Torah. But occupying Syria he gained the right to crucify Jesus and by occupying Afghanistan has attempted to divert

the world's attention from the growth of the religion of Al Islam. We must understand the precipitate of an American world is the capture of the worker. Whereas this causes World War, global war is caused by the American capture of our staple food. Instead of dying this way, we must learn to live properly as workers not slaves. And to have food, not be without.

We are in dire need of making a movement towards that which we'll understand is where neither the hand that takes or receives Providence nor that same Providence (rizk) will do us direct benefit. In fact, we are beneficiaries of a hand that can and does give us halal Rizq ,and that is God Almighty. Allah subhanahuwa wa taala is to whom we must move closer to, to find that.

5. US GDP 2050 in line with population

The problem with decolonisation is it is unsuccessful at the military level inspite of it's economic success. the problem of reverse colonialism is that is, like decolonisation, a cause of white christian terror or colonialist terror. The more pertinent model in this case is that industrialisation has spread from where it was localised to over the globe, all while deindustrialisation is noted to have occurred historically in the same countries which are today industrially advancing.

In a sense, industrialisation in the west was fuelled by the lives and economies of the East and not only did it prevent India and China from industrialising until recently, but now as these countries are industrialising, we have the so-called already industrialised nations as reparations. Pakistan, middle eastern economies, India and China; will with religious change primarily in Europe, yield both industrialisation and the already industrialised countries for the countries where we were deindustrialised.

This is a very slow process as the richer countries say the opposite during their industrialisation. That we who are industrialising are the force to be reckoned with now as well as the conquerors of industrialised nations. This conquest of the west, framed as a part of modern economic expansion and industrialisation, is seen as both a further development from

early industrialisation and a religiously awakened collective human enterprise, especially in western circles where this movement of countries are where coloured people, specifically Muslim peoples are coming up into majority.

US share of world GDP to fall by five sixths by 2050

US GDP 1950- 2050

Year	Output	Usa	%
1960	\$1.37T	\$0.53T	40%
1965	\$1.97T	\$0.74T	38%
1970	\$2.96T	\$1.07T	36%
1975	\$5.92T	\$1.69T	28%
1980	\$11.23T	\$2.86T	25%
1985	\$12.79T	\$4.34T	34%
1990	\$22.63T	\$5.96T	26%
1995	\$30.89T	\$7.64T	25%
2000	\$33.62T	\$10.25T	30%
2005	\$47.53T	\$13.04T	28%
2010	\$66.13T	\$14.99T	23%
2015	\$75.22T	\$18.23T	24%
2019	\$87.80T	\$21.43T	24%
2025	\$100T	\$24T	24% NOW
2050	\$600T	\$39T	7% ...(Ideally, as per 1950 pop.)

The decline of US GDP in world output. Assuming output as 600t USD by 2050.

Whereas USA has had six plates of pie now it will have only one

1950- 6 times (40/6.3)

1975- 5 times (28/6)

2000- 6 times (30/5.3)

2025- 6 times (24/4.2)

2050- 1.34 (*assuming 0.5 b. pop. 6.7/5*)

If only the scaremonger would understand the counter-intuitivity of the media war, would the warmongers understand the counter-intuitivity of counter terrorism. So-called terrorists might be forgiven but a counter terrorist can neither forgive himself nor forgive others and so cannot be forgiven, yet it would seem we have to do so.

Sectarianism is the threat of the kuffar on Islam and Muslims that we can drive a wedge between ourselves. This is a Satan's wedge that Jews, Hindus, Buddhists, Christians have been preparing under Satan's instruction. Having seen the circumstances of the situation on the ground, which is that even in the USA, around 15% of women suffer rape or attempted rape. This represents the Oedipus complex out there, where infantile people seek refinding of lost parent figures; but there are newly invented ways of doing this such as the Samson complex, where it is not crime that is perpetrated but rather legalised murder or rape, such as war. Here, war is world war or global war and no one has any

qualms about it. True, the oedipal personality has taken away many of our loved ones at the hands of the complex, but it is war or total war, automated war, permanent war, perpetual war, world war, global war, which is a new worry. This has taken millions of lives unnecessarily.

Indeed, given the severity of this love affair, it is possibly hard to imagine anything worse. Like the Rustam complex, where we murder billions. Where we orphan kingdoms or generations (eg Iraqi children, Syrian children or Afghani children) and it is as Afpak, where the world's greatest country by number (ie. a Gigapower) is being orphaned (having no parents left) it seems we have made ourselves extinct just by doing this.

The cracks in our international order are appearing to the world in this way. It starts off with an innocent empire or colony and before we know it the entire creature of our species is under threat, including our every last country.

We must imagine we are Hazrat e Musa (AS), nationalism is a Pharawn and sectarianism is a Haman. As Muslims, as human beings, we have a core and a shell. This is where we want to be as a peoples, in the middle of the Mizan of Allah subhanahu wa ta Ala. All Muslims are taught we are going to stand alone on front of our Lord. All Muslims are taught to fear the Scale of Allah ta Ala, His Justice, His retribution. All Muslims are taught that this scale is severe, very severe.

Then, in life, we must learn not to fear standing alone nor fear the need to lead others; not to avoid justice but to follow the Shariah; not to fear talking about Allah and the Last Day nor the severity and scale of His Recompense. Right now we are not outside of our shell. We need to come outside of our shells. Picking Egypt, Indonesia, Asia Minor and another example such as Nigeria, Iran, Argentina or Japan; give a different bloc for BRICS economies to operate with. PEAKS with Saudia Arabia, Islam's biggest economy, other than Turkiye.

For Pakistan to come out of it's shell, for the living forgiving of Prophet Muhammad (SWS), we must overlook terrorists, counter-terrorists, colonialists and decolonialists alike. We must try to create an empire in this world. If we are rebutted then so be it, we would have tried at least. If there are nearly millions of Pakistanis here in London, some 3 lakh, with around 4 lakh Urdu speakers across Britain. We have to pick up Nigeria, and turn it into a Gigapower, or Indonesia. Because US, Japan, China and Europe at large have industrialised and have access to 100% literacy and 100% internet connectivity, we should try to catch up. Because India is going to try to reach China's place soon. With Hi-tech cities such as in Hyderabad and Mumbai, Asia will be brought into industrialised world and Pakistan must come forward, Pakistan must come out and Pakistan must come good. Even if we unindustrialised economies, at present; aren't to lead the world as such, we are rather to lead our

regions, our geographical areas. Pakistan is the MENA's leading firepower (at number 7, followed as per global firepower ranking by Turkiye at 11th in the world), Nigeria is Africa's new economic superpower, Argentina is South America's, Egypt is the Arab world's largest country, Kazakhstan is Asia Minor's, Indonesia is Oceania's greatest country and Saudia Arabia is potentially a very rich country. All of these have potential tomorrow to be what the industrialised world countries are today. Such as are Iran, Turkiye, former superpowers of Islam and a form of historic powers, Sultanats or dynasties who can match today's megaeconomies.

6. The world economy

The fact is, the eye of any economist goes towards GDP as does it go towards per capita GDP, when analysing prosperity of a country and so for many countries.

When, as historians we study decolonisation; and as a Pakistani people, we must see ourselves as involved with this scientifically as the country we come from is part of a former British colony.

However, some, such as Aditya Mukherjee and others (2007) in “India since independence” show per capita of industrialised nations during industrialisation, I find it more pertinent to show the real GDP of what I term, the great economies of the Islamic world or the Dar al Islam (at least partly) countries of the world, our world.

The figures are used to show not only that India does better being independent but that given the radical assumption of decolonisation (see title, “Empire: How Colonial India made Modern Britain”), that Britain had something to gain by growth, lack of receding growth, through letting go of colonies; or at least had nothing to lose: instead of looking at accounting for the British in India, in this instance, the common or lay economist looks around himself and sees the industrial revolution GDP growth of 1% but he should also see today; Pakistan, India and China are achieving an

industrial revolution. Irfan Habib tells us 9% of GNP was lost, 30% of capital in Britain was from India, and with West Indies, 19th century capital formation is 84%.

The Christian schizophrenic

Whereas Jews cry, “death to Arabs, death to Christians”, Indians cry, “First kill the butchers then the Christians”, Christians are being amnesty for their wars against Islam and Muslims. Why?

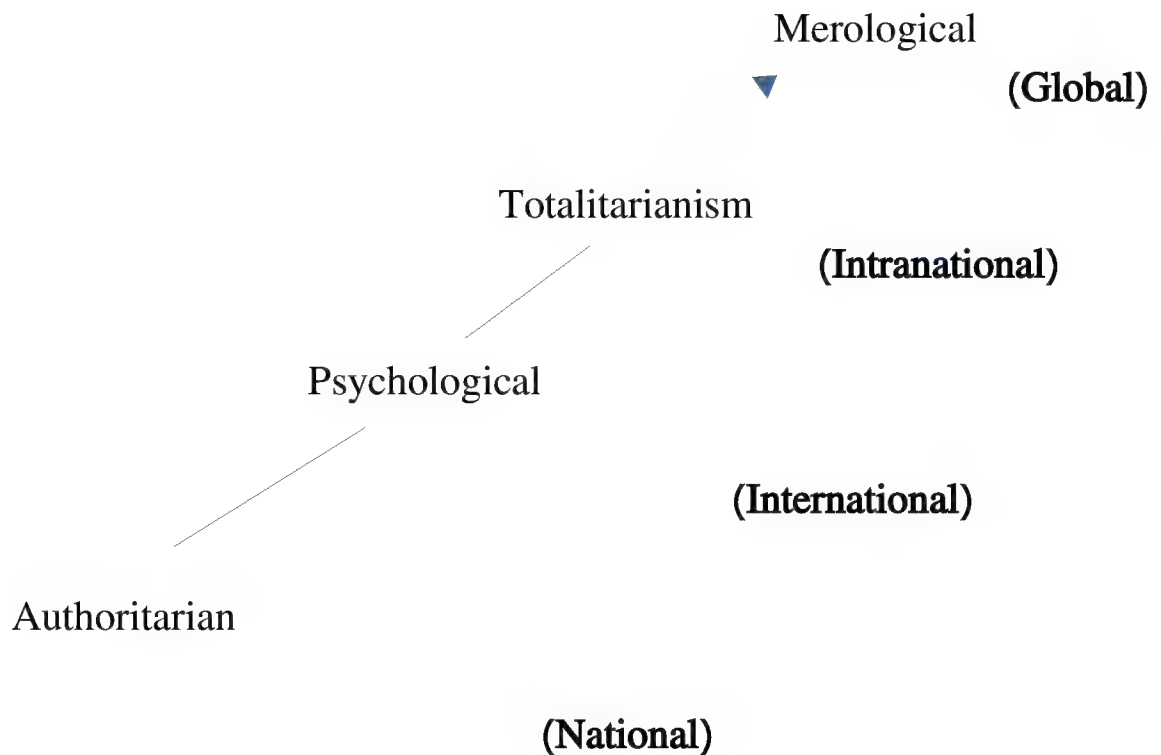

True, USA and UK compare as much smaller nations than India and Pakistan; USA, a quarter the size of India, and UK, a quarter of the population of Pakistan.

True, USA has only Brazil to help fight it's corner of the world, in terms of other similar countries, with which empire of some sort could be built. It hasn't got a case for imperialism nor colonialism going forward. But, the world war's allies, have gone to war of late, with every Muslim power they could possibly do, without being roundly defeated. Pakistan, India or China could have killed Americans on their own soil. Iraq, Afghanistan, Syria, Somalia, Yemen, Saudia Arabia, Sudan, Bosnia; all suffered megawars and inflicted no significant casualties on Americans in America.

No, USA never declared it would fight ten of the fifty (20% saturation) of Muslim countries ie war against Islam. Whereas

Muslims, when we kill in UK (eg. 7/7 in London), we declare war on infidels (eg. Omar Mateen did this too).

Defeating totalitarianism

From the top; Pakistan, India and China and other smaller countries (USA & Co).

**Assertive: Merology- global vision for states such as Pakistan
Totalitarianism – Chinese**

**Paranoid: Psychological- Indian
Authoritarian- Smaller nations such as USA, UK**

Flow of type of power

1. Centripetal fission (nation-state)
2. Centrifugal fission (International trade)
3. Centripetal fusion (Intranational growth)
4. Centrifugal fusion (Global model)

Hitting the bullseye

Today, hitting the target as per the day's leading economic power cannot be achieved without planning of output. Of the greatly populated countries of our world that is Pakistan, India and China; each has the right to plan to defeat all others by the production levels. Where one may ask is USA? Where is UK? Where, the USSR? In summary the bull's eye can only be hit by a true Giga-economy; one which mobilises and empowers billions in a nation state. Nevertheless, the bull's eye religion is yet to be hit by Pakistan, India and China (By 2050 likely to be the three most populous countries of the world).

The UK, USA: London, is likely to turn as far as religion of the masses goes to the religion of Islam.

Truly, we are witnessing China's gross domestic product as PPP (purchase power parity) exceeding others, a hit of the target.

Similarly, if neither UK nor USA, have Christian majorities, they can be termed Muslim given more Muslim worshippers live than the non-Muslim faiths.

I am a pacifist and no great sheikh on Islam and the lives of Muslims. But, it is above the ijtiḥād; knowing how to do analogical reasoning and to apply it, to be an exegete of the Holy Quran.

To know what is best for humanity is in our Holy Qur'an, to know the Holy Book. This is what I am a student of. Not of reasoning or Islamic sciences such as Ilm al Iqtisad nor Imrāniyyat:

“Say: be in motion throughout the earth and look on how He began the creation. Moreover, God will truly cause the last growth to grow.”

29:10 The Holy Qur'an

7. Islamic sociology

Khilafat

The reason Italy and Germany became Fascists and Nazis in Europe in the last century is simply that Britain and France were colonialists throughout the globe, in the previous few centuries. It is a generally accepted theorem that America and the imperialist drive was not responsible. Nevertheless, counter-terrorism causes war. Wars are there as well as terror. I would say the forgiveness is therefore for terror plus war. War causes civil war as well. Civil wars are there as well as global war. Nevertheless, America should stop bombing Muslim Ummah countries and leave the Middle East region.

Islam in UK

Bradford	31% Muslim	34% Christian (2021)
Birmingham	30% Muslim	32% Christian (2021)
London	15% Muslim	40% Christian (2021)

2021 Census UK – 7% Muslim 46% Christian

The reason the above statistics are here is that London is likely to gain the halfway house to dar al Islam in one or two decades, taking London to the Bradford or Birmingham level of Muslim population saturation in Britain. This would take us out of a significant and sizeable population to a statistically dominant one.

Black lives matter, London Multicultural English and Black and Mixed Ethnicities

This will take us away from the old LME, BME, BLM cultural complexes through Britain's Mosque goes rule becoming Britain's Muslim Ethnicities rule. In this way Londonistan Muslim England is created as a new country. The international reputation of Britain depends on Britain's Muslim Ethnicity and the Britain Londonistan Muslim. We can only look forward to this if we accept this is as an internal and external definition whereas Great Britain is only internal. England, Scotland, Wales and Ireland are only internal. Islam is the very relevant religion in America today. On the daily basis, they follow the practice of Islam as religion. Islam in the news media is worth a lot more and

this is the goal to fight RSS, Neo-liberalism and Zionism.

Going forward as a culture and ethnicity, we need to fight for independence and not just highlight immigration as a sociological phenomenon. To do this, we must individuate: metals and metalwork can create or have in the past created means of production characterising human epochs. In this sense, Nabi Ibrahim alayhi salam must be our bronze or Kansi age. Nabi Isa (as) before must be our Iron Age and then we can know that really like this, humanity is one and can be one.

What is a modern human? He is a follower and of the Holy Prophet salAllahu alayhi wasallam. He is not Homo erectus nor Homo sapien. He's submitted to Allah, submitted to Allah Almighty since Iron age, he is a believer in Allah and His messenger (sws) so that is enough for his identity being Muslim. It is beyond country and nationalism, beyond tribe and race, beyond family and worldly affiliation; he is a human being first and he is no longer a good shepherd only, he's a great one.

In essence, Britons are no longer churchgoers and as well as this we are now Mosquegoers for it seems forever to the end of time. Whereas the first is an economic fact. That materialist dogma precludes adherence to religious norms. The second is clearly religious one or at least a revolutionary sociological one. Combined together, the ascendancy of Islam is a fact of Great Britain being a part of Islamic sociology and the fact of having an Islamic sociology.

Islam is on the horizon and we anticipate religious admissions to be greater for Muslims than Christians. Along with language adjustments, cultural contextualization, given this new society is building the future; there is nothing wrong with saying Britain is becoming a Muslim country. It will be insh'allah. It is a free country. The logic runs that whereas it is no longer a Christian country by statistical majority implies the relative majority can still continue to live according to Christianity (political Christianity or French Christianity), we nevertheless seek recompense for war crimes perpetrated by the old state. And so our reparations are explicitly economic and so on. The more fitting form of majority therefore is the one which actually is practised and is adhered to in terms of

weekly participation. The demonstrative faith is more important in this case simply because here there is no absolute majority faith. A similar situation exists in USA, there is no Christianity (majority) and Islam is adherent to on a daily basis. The reason you have this is not that the Fiqh of Dar Al Islam is fickle: Bosnia is now Muslim, Nigeria is now Muslim etc. Rather, the way democracy is forced upon us means a system of rule is irrelevant to faith.

Take Lebanon for example, it is clearly dar al Islam but isn't ruled by Muslim as far as the prime minister position goes. The same is for the dar al ahad or dar al amman of Britain. It may be Islamic sociologically, but the ruler isn't chosen as per religion. When it was Christian, it wasn't then either.

Indeed in Sunak's Britain, if Christianity is a relative majority, the democratically-elected Conservative government cares not because it takes his directive from the people. It is not the defender of faith of the christianist faith; the king, who has authorised the government. Who is the king to authorise the religion? Further, Christianity is a splitting of monotheism, monarchianism, monism, modalism and

monasticism; then all these things are really a religion, philosophy, theology and a way of living life; only testifying that is not only that Islam is on the horizon. Jesus is on the horizon. Angel Jibreel is on the horizon. The Holy Prophet (sws) is out on the horizon.

Reparations for megawars

UK and USA will function as reparations for the mega-wars that they have waged without reason. They will exist for the purposes of immigration only.

The fact is the ally states in the war on terror, such as Pakistan, have suffered hundreds of thousands worth of human losses; and the enemy states themselves, have human losses in the millions and tens of millions directly affected such as injured, orphaned or forced out of their homes. The average military loss of world wars, of twenty million is achieved, over the thirty-plus years of conflict eg Afghanistan, plus ten, twelve other countries.

Great power

What would happen if, having produced and worked automatically when in our working life, we go into our daily environment and get all mixed up as groups of consumers. The coming generation with Praxis A, can better understand us as their predecessors, did what we were told to do by our predecessors. Practice a is doing what is told by us to do ie. by doing what was wanted to do. It identifies as the internal element. Basically sans the dimensional proponents- a new country, a new identity, new people as emigration means risking life and sacrificing efforts of teamwork.

Primary social religion means becoming Muslim; it's mosque-going, namaz-praying are conquering in Islam. This is deen.

8. Daily, weekly demonstrative faith

By effecting change to the daily practice of our country, the UK and USA, it can be seen there is no return to Christianity, because the praxis a concerns worship not just a ritual of life or creed. This is what we have seen here in Britain since a new millenium began. Indeed the extra millions have been praying as Muslims have had an influence because they find the reason for human existence is the presence in the place of worship.

Britain is now a place of Mosque-goers and it is indeed Britons who are now Mosquegoers. However, for namaz to be the new norm, more Britons do on a Sunday, so to speak; and the new Sabbath (Friday afternoon), it has to be shown to be more popular.

Today the world of media and within that internet, exists for the purposes and intent of information, entertainment and education. True, the imagination of men exists with a purpose of water for the woman and bread for the children.

In theory if an Islamic economy grows twice as fast as others, specifically the Christianist ones; after x number of years, even at 10% per annum growth, a 50% smaller economy will level off in five or six years. Five periods of growth to which COVID, recovery, pre-transition, that levelling of India, and then India becoming part of greater economies than USA, is the next three years, times 5=15 years.

Tribalisms

When we look at the masses of Christianity-following people in the English-speaking world, it is warned against us to blindly follow, have faith or trust in capitalism, trade unions, entrepreneurship and collectivism. The state as it is seen as laying its clutches in people's will to power and action.

Nevertheless, Islam firmly teaches us the fact that social solidarity within a society isn't always directed towards piety in self and other, but rather focus is formed on his own goals after political thought and beforehand. This concept of asabiyat is a schema, anathema to the directives of the faith of Islam. Part of being a Muslim is to speak up against

totalitarianism voices, for example, all people should not say China is my mother; Islam: Islam, a mental illness; no matter what any state says. However much we say made in China we're neither Chinese nor can we or Chinese people see.

Similarly, if a lot of products said made in India, the response to say mother is India is unlikely. I was saying India is not. While it is true, they are children of one form or another, even people do. They don't eat meat. This means they are prohibited from doing so for reasons. Our faith is no mental illness. To say capitalists are so for they are prohibited fraud and perversion such as profiteering. Trade Union union are so prohibited slavery and exploitation, entrepreneurs prohibited poverty and borrowing and the collective is, such as even a Zionist or Hindutva, is forbidden being on the own and laziness.

Unfortunately today in the world, if hunger means beef and thirst means Coca Cola, what is piety? What is spirituality? This is why self righteousness and faith are adult postulations; interrogating these concepts, God and religion take smart trust and reasoned faith. We shouldn't take it for granted. Fortuity

otherwise will become a demise. Praxis A is so named, the generation a. No amount of accounts, business, commerce, developmental economics will find what God almighty wants of us. He wants to suffer us. Gen A is those of us who are children. In the West we have annihilated the children's worth of the Syrian, Palestinian, Sudanese, Somalian etc. for no reason whatsoever: without a fair trial, given the adults were the ones murdered in millions. Also Bosnia, Haiti, Sudan etc.

Praxis A, Generation a, are saying calm down to Generation X and millennials etc. But as fortuitous economies, how else should be treated the declining economy? In all religions the burden of practice is a sacrifice to be paid for faith. With real belief, there is no such sacrifice; and behaviour is power and faith is responsibility.

Bigger than the benchmark

The story of the countries of the former third world China, India and maybe one day Pakistan, overtaking all others and gaining economic ascendancy is much like the tale of someone who was weak in the world and managed to

overcome his feelings of inferiority. Eventually India and China will rival USA. Pakistan has Britain as a benchmark.

Britain is no longer a top 10 economy in the world. Pakistan plays 27th in GDP PPP and growing quickly will take in two or three decades to match the once home of the Industrial Revolution by economic output. Nevertheless, Pakistan is by people thrice the size of UK economy. It matches this then we'll be having a third of the per capita GDP. In other words, Pakistan will do as well as the benchmark, Britain. If only India, China and USA were above it and all the rest below.

So Pakistan now like India, like China, is a bigger power, a gigaeconomy and like it or not, bigger than the benchmark itself sets for its goals. Pakistan, India, Indonesia, Bangladesh and China are hitting the bull's eye, but do they need to do that a little bit more to kill their victim in the hunt.

Unfortunately, for spectators killing the hunted is not part of a plan of attack. The game is not a chase. It may be that China is twice USA where people and greatness are concerned but what of their income per capita? It still needs

to be achieved as a benchmark and looking at Third World Economics, this is what Europeans and Americans tell us, indeed what their economic textbook tells us. If countries like Pakistan, India, and China are to evict America, Europe and Japan from their threatening to remain in world systemic power, we must learn to not only garner a willingness to gain from new technologies, but to instil a devout forgiveness upon our loss of yesteryears output.

Whereas art imitates life, technology has the power to recreate it. Those who tried to conquer it have only destroyed it.

History

Violent upheavals such as transformative revolution, in the case of modern China; mass mobilisation warfare, the example of the States; massive famines such as the Raj in India; and state collapse like here in Britain, have meant the idea of Europe being created as an economic bloc by the Black plague, a fourteenth century catastrophe plague across our continent, has been all but overruled.

But is this New Stone Age or the Neolithic period, the result of a great leveller of income inequality by Allah's hands too? So, why is ancient India or Ancient Pakistan, I should say, not brought as a proof against this? The Indus man, Tim, is a Homo erectus, who named China as China; the Indus man is the father and the sons of Noah, the Table of Nations; the Indus man is Adam (peace be upon him and his progeny), and his son. It is an antagonistic thesis to say income inequality can be avoided by violence.

Nay, India can be created, China can be (a modern China), USA can be! It's possible to see USA as World War, Chinese communism as famine. British empire as Indian, and that the Bronze Age is our Neolithic (the Bronze Age or the Neolithic Age is the ice age) but it simply isn't true. It is the opposite. To be honest, USA raped the world; China, Mao et al, raped China; Britain raped India: but the Great Flood, which was Allah's punishment, that inspired the world towards agricultural revolution, or the Stone Age revolution (or Neolithic Revolution).

The facts of India and Pakistan are that homo erectus was a Pakistani, homo sapiens is Indian.

Pakistan led the world in the stone age for millions of years, when man first came to Earth. India led the world in the Bronze Age for thousands of years, and Homo sapiens is defined. China led the world in the Iron Age for hundreds of years, the age of Christ. USA led the world in the modern age for decades. UK, well, we may see a return to the Silicon Valley age and for years into the future, we will see the Umar e Malumat, the Omar e ILM or the information age or the age of the Giga powers.

This is a sharp contrast between using data and using information. Indian technology, Pakistani systems; but the essence of the computer is the same to the handheld desktop laptop or otherwise pocket held easy phone computational device able to recreate aspects of the external world to amazing extent and purpose.

Yesterday, Japan made high tech devices to rival the world's superpower to compete as a potential superpower of the

world. Today China will find the way the copyright to provide a superpower for the world to produce microchips. Tomorrow, Korea will find the market being monopolised and before we know it, India will come into the game and Pakistan will not be far from the superpower league insh'Allah. After Indian, China; Pakistan is the greatest and only current competition to USA if it can rival Indonesia in population. So why not?

The “king”

In London, thirty- something percent of people are White British. The rest, of course, are Non-White British: meaning the Blacks, Asians, Muslims are in majority. Similarly, Britain-wide, Non-White British are a majority. If there is any confusion as to where to look for the jurisprudence for the country, clearly the answer is that without any system or majority system, instead of having the nearest relative majority rule the country until a greater popular relative majority emerges; the religion of choice should be sought to rule.

Surely, if we have a FID DEF, a defender of the faith in this kingdom as opposed to a constitutional democracy, it is valid to appeal to the common faith nonetheless. It is much like Islam to remind us, God Almighty created all causes in the universe; if there is a cause which has created another cause, that first cause was created by God Almighty.

If Christianity is no longer an absolute mathematical majority but rather is a, mathematically, relative majority; it matters only less that Islam isn't a relative majority. It is now apparent that the country is no longer ruled by its people, in the sense of Anglicanism having fallen from the privilege it enjoyed.

Not only does this reaffirm Allah Almighty is the logical source of law here (given the higher popularity of Islam in practice) but it shows implicitly that the cause behind the cause is God Almighty. If one were to ask, if God Almighty is the cause behind the universe, who created God Almighty; then the answer, that no-one needed to create God only doubly reaffirms the jurisprudential riddle, because neither

whites are in majority nor Christians. Therefore Islam as a non-racial religion, indeed becomes the religion.

Inclusivity and diversity

The world we live in today should rightly be one where the moral impetus is for social inclusion. Nevertheless, if we so desire to include others in our morality and custom, and actually do aspire to fulfil the right, we have many battles from east to west to fight, to build the morality of inclusivity. Indeed, to create morality for inclusivity we have clear hurdles as a species of humanity: Firstly, to counter the Islamophobia prevalent in our world, it exists such that they want us most of us to think the human being fell to earth because they have killed so many of us. Secondly, to have the greater populaces of people's enjoy productivity increase. To do this with Asian economies, is necessary to recognise that since the Iron Age, they have been bigger and richer countries. Thirdly to limit the economic share of wrongdoers or transgressors to the mode. For example, USA should only have its share as per people and not more than that. Fourthly, for Europe and America to Islamise for the good of their

own guidance and gaining of piety before God Almighty.

This is the only way that globalisation can fulfil the rights of people. Indeed, there are the duties of Muslims, Asians, and Americans, European Muslims, and humanity in general. This is the future:

- Islam -Muslims agree our duty is the jihad and that our failure is a failure of our jihad. But no-one is prepared to fight anymore. Jihad is to kill and be killed.
- Anti-americanism - The G7 is now smaller than the E7. The world is changing and changing fast. America's role is dwindling in the world as Americans grow fatter and fatter.
- European Islam - After the Holocaust, which was the war Germans waged in Poland; Europeans entered into war in the Muslim countries far away from their home continent.

Whereas the world wars were two, there were seven wars against Islam. Islam is increasingly seen as the religion which is practised of the continent's people.

9. The New Europe

A significant and sizable killing off of the human race by any particular component or other mobilised force of nature is termed encroachment. The Muslim world has been partly wiped out by the West is like humans being nearly or partly wiped out. The main and basic reason why imperialism and colonialism led to these mega wars or Gigawars in various countries and continents, culminating in continental Gigacide and the wars of terror is that whereas Islam teaches us the love of one God Almighty; the disbelievers are at war against this.

Their culture if you will: Yog, loves many gods and as this makes no sense and if there were many gods there would be war in the heavens; they resort to war tactics, in their business and in the basic relations with us. This is called the perversity of polytheism (polymorphism). That when we study the tactics of the *kuffar* non-Muslim countries during wars they waged against us, they use every evil to such an extent to bring their own humanity into disrepute.

Polymorphism is explicated psychologically, sociologically, politically and economically. The most pertinent explanation for their politics is that they have learned to make countries in imitation of our nations. The British Empire, American aggression, Greater Israel and the New Rome, as well as Hitler's Third Reich, not to mention modern India and China; are copies of Muslim nations, whereby there is such as is impossible to know any distinction between the language, the culture and the religion.

The British Empire: the language is English, the culture is English, people are English and the religion is British. The United States of America: the language is English, the culture is Western and the people of the religion of Christian. In Israel, Hebrew, Hebrew, Jewish religion, no Hebrew religion as well; like in the Nazis, German language, German culture, German or Christian religion. In India: Hindi language, Hindu religion, Hindu culture, Hindu religion. In China: Chinese language, Chinese culture, Chinese religion. Historically, the ancient Greeks and indeed the Latin-speaking countries too were at one point, the polymorphous perverts.

The basic problem is they don't recognise different cultures nor any other languages-speaking people and fail to respect other religions. To repeat myself what defines polytheism in this evil is that the polytheist doesn't give due credence to different outside cultures; due to his racism doesn't have time for economic systems other than his non slave-taking and wants other language speakers to be his slave, and is perverted towards people of other religions all except the one he has himself.

This form of religion; maybe British, Christian or Jewish and is marked as a trinity of evil for Muslims. This all goes unrecognised by the people of the time because of the interplay of governments, businesses and homes. For example, private mercenaries in wars who are free to make extinct, murder and rape.

This evil of murder and rape and so on goes on, as the evil empires consolidate their own evil, language, culture, religion. Nevertheless, this is all the same to these evil-doers. I've dealt with economic misallocation, social inequality and

political poverty. But the basic problem of psychological perversity is a very heavy burden in a human beings life and the cause of severe trials and torture etc.

The politics of Pakistanology, the economics or Giga-economic/ Gigaforce and Gigapowers. The social Londonistan, the psychological disproofs of trinity (and trinitarianism). This form of religion such as the Adolf Hitler, leader of Germany, made of Nazi Germany has no real language, no culture, no religion. Is dissimilar to as Pakistani military leaders have said, we rule people, by people, for people. We distinguish in Islam; by rule of Hitler's, by Hitlers, for Hitlers.

Democracy is a way of divide and rule set up to destroy humanity by vying human beings against one another.

Politicians are murderous freak demons going crazy. Rule of the many by the few or put simply rule of the few is where there is no intelligence, no language use, no cultural ideation, no religion. They are prepared for no internal nor external discussion, then they should long for death.

In spite of the fact that democracy is a system that had that led to a practical extinction and mass murder and rape, it is precisely through this, or at least Islamic democracy or socialism that we can get out of the trap left for us and by avoiding retribution for the client and taking blood money reparations of the continental genocides. Africa deserves reparation and this is an accepted popular feeling that Asia and the Middle East do too (continents which have large areas of land almost completely under control of Islam and Muslims). This is a slightly more recent idea, this idea is created by the wars of terror of the West. These mega-wars are wars for which, although millions of innocent Muslims are killed of late; no one is really fighting back properly, and like declared 7/7 bombers declared war and Omar Mateen declared war.

The reason Imperialism is hidden by colonialism and genocides are hidden by these evil human realities is that for example the Roman Empire; Latin language has with the American Britain who make war with the whole world culturally too and try to pervert religion: atheism, agnosticism, etc. This is hard to detect other than Nazism and fascism. In

fact, if you analyse Rastafarianism, it is possible to observe the divide and rule of Ethiopians, for example, or some mega-murder of their people at the hands of Mussolini and so on. Modi is another example, conjugation of polytheists in perversions. Language is Hindi, culture is from Indus man and religion is like Dharam. Modern China is too, where they force Muslims to a fake mother tongue, a fake country and a false religion of atheism.

We see this thing a lot in Europe, where instead of atheism, there's agnosticism. The devil's language, the devil's culture and the devil is religion or irreligion, I should say.

In fact, Kufr is what Muslims suffer from in poverty and in stress. shirk is our own mistake. In the Middle East, the problem of Israel getting other Muslim countries to do its dirty work is similar civil war which erupts from imperialism and colonialism, itself arises when a power or country, often Muslim countries are attacked by the evil doers. We know most of if not all warmongers are not Muslim. This is not scare-mongering but is the truth. Psychologically, they have

no mothers, sociologically no lands, economically no sense of justice, and politically no peace ability, no peaceableness.

The politics of a new Europe, and the new global politics is emerging from the Islamic faith. May be a new polity will too. A revival and a new sense of comity in the international order will come from the Muslim Ummah. The new and more Muslim Europe than ever before; will have equality in economic justice; peace-loving political lives being lived and will be a real land with a real society and also have a reality psychologically.

“Knowledge is acquired by trying to learn, meekness is learnt by training to be meek, whoever seeks goodness will be endowed with it and whoever wards off evil will be protected from it.”

Imam Suyuti's Jami as Sagheer Hadith collection

10. Istifaf (Abstinence)

The purpose of *istifaf* ie. abstinence in our society is to drive tolerance for other people (*tasamuh*), the word, like *tasfif* in Urdu is from *saff* (a row) means the Islamic usage of rows of congregants of a prayer or rows of soldiers of an army in a formation.

Saff means to arrange in rows as in the examples, a *jammāt* for prayer or a battle formation.

Similar to abstinence from alcohol, drugs, sexual promiscuity, *riba* and gambling; in the sense of financial *tasfif* or metonymisation, it can refer to the rows of goods of produce that a seller will present for sale. To a lesser extent it is used as a reference to the ordinance of monetary value assumed for the activity of a purchase from a place of sale.

The implied ordinance of a row can correspond to the rows of the physical good or produce made available to a person who is attending the commercial point of sale. When a shopkeeper puts his goods out to someone in a shop, for

sale; he is going to, by very nature of having a row closer to the customer and gradually further and further away; make a more easy sale in the closer, accessible row.

However he should not take advantage of this fact that he knows. He should realise this and content himself with this extra demand due to these closer rows.

If he is greedy; should he decide to put, for example, less than perfect or faulty goods for sale at the front, and leave the newer or perfect goods behind it, it is an accepted idea that this is ethically reprehensible. It is cheating the customer. It is tricking him into believing his goods are OK when they are inferior.

There is both an economic and a financial aspect to the missale. In economic terms, a faulty product is being sold and in financial terms the product is being sold in good faith.

Economic Tasfif

All too often trade is a name we give to a lack of any real metaphors of buying and selling. If economic metonymy is framed as the row of soldiers then how wrong for a trader to sell a faulty good, product or service, in the first place? He should be happy to serve his life in the performance of his duty of service. The service of no nation or community should match the zeal for the service of Allah Almighty and His creation. Nevertheless, reading between the lines we can see economics of many people and indeed communities as fraudulent. This is why a soft, middle road is sought after against this.

Financial Tasfif

Whereas the economic metonymy is one of a row of soldiers; financially it is like a row of worshippers who have amongst them an enemy or in this case possibly, a deviant. What is in error here is the motivation or intention behind trading. Is this trade or this trading business, in a mental persuasion of good faith? Clearly it is dependent on small print, this trade is evil and is an evil practice.

Tasfif

In summary, economic and further than that, financial Tasfif, is the replacement of one of the words in a sentence, like a play of words. Therefore it is very difficult to get around it other than to employ, with a view of doing to others what you would like for yourself. Other than look at the basic metaphors behind the problems. So, in fault we should forgive; in bad faith we should return good and in greed we should be generous or else in cheating, we should be honest.

Only this way can our soldiers, all of us, stand in our rows in our formations. Only this way can our worshippers, all of us, in our every row; stand neatly and altogether.

83. Surah Al-Mutaffifin (Those Who Deal in Fraud)

1. Woe to Al-Mutaffifin [those who give less in measure and weight (decrease the rights of others)],
2. Those who, when they have to receive by measure from men, demand full measure,

3. And when they have to give by measure or weight to men, give less than due.
4. Think they not that they will be resurrected (for reckoning),
5. On a Great Day,
6. The Day when (all) mankind will stand before the Lord of the 'Alamin (mankind, jinns and all that exists)?
7. Nay! Truly, the Record (writing of the deeds) of the Fujjar (disbelievers, sinners, evil-doers and wicked) is (preserved) in Sijjin.
8. And what will make you know what Sijjin is?
9. A Register inscribed.
10. Woe, that Day, to those who deny [(Allah, His Angels, His Books, His Messengers, the Day of Resurrection, and Al-Qadar (Divine Preordainments))].
11. Those who deny the Day of Recompense.
12. And none can deny it except every transgressor beyond bounds, (in disbelief, oppression and disobedience of Allah, the sinner!)
13. When Our Verses (of the Qur'an) are recited to him he says: "Tales of the ancients!"
14. Nay! But on their hearts is the Ran (covering of sins and evil deeds) which they used to earn.

15. Nay! Surely, they (evil-doers) will be veiled from seeing their Lord that Day.
16. Then, verily they will indeed enter and taste the burning flame of Hell.
17. Then, it will be said to them: "This is what you used to deny!"
18. Nay! Verily, the Record (writing of the deeds) of Al-Abrar (the pious who fear Allah and avoid evil), is (preserved) in 'Illiyyun.
19. And what will make you know what 'Illiyyun is?
20. A Register inscribed.
21. To which bear witness those nearest (to Allah, i.e. the angels).
22. Verily, Al-Abrar (the pious who fear Allah and avoid evil) will be in delight (Paradise).
23. On thrones, looking (at all things).
24. You will recognise in their faces the brightness of delight.
25. They will be given to drink pure sealed wine.
26. The last thereof (that wine) will be the smell of musk, and for this let (all) those strive who want to strive (i.e. hasten earnestly to the obedience of Allah).
27. It (that wine) will be mixed with Tasnim.
28. A spring whereof drink those nearest to Allah.

29. Verily! (During the worldly life) those who committed crimes used to laugh at those who believed.
30. And whenever they passed by them, used to wink one to another (in mockery);
31. And when they returned to their own people, they would return jesting;
32. And when they saw them, they said: "Verily! These have indeed gone astray!"
33. But they (disbelievers, sinners) had not been sent as watchers over them (the believers).
34. But this Day (the Day of Resurrection) those who believe will laugh at the disbelievers
35. On (high) thrones, looking (at all things).
36. Are not the disbelievers paid (fully) for what they used to do?

All good that I say is from Allah subhanahu wa ta Ala and any wrong from myself. All Praises are due to Allah. May Allah send salutation upon His Blessed Messenger.
